for Composite Board; and

Using Formica® HPL HGP according to

**DIN EN 438-1** and

**DIN EN 438-2**

### Applications

interior

horizontal

kitchen  
work surfaces

counters

Generic name: Postform worktop • Easy to clean and safe for food preparation areas

Formica® LifeSeal® Worktops provides an unbeatable, low-maintenance, durable and dependable work surface that is easy to clean and hygienic too. With its closed surface, simply wiping it down with a damp cloth is enough to free it of stains and leave it hygienically clean as kitchens should be.

Formica® LifeSeal® Worktops combine the strength of BisonBord® with the durability of Formica® HPL, giving you wear, scuff, impact, stain and moisture resistance, so they're ideal for kitchens.

The LifeSeal® strip prevents water from trickling under the worktop and penetrating the BisonBord® core, so your top will not swell, keeping your decorative surface solution functioning and looking fantastic for years to come.

PG Bison's locally produced Formica® LifeSeal® Worktops are on trend with international styles with their modern, tight radius and choice of stylish designs in either a texture or gloss finish. And without the hefty price tag.

Remember, during installation, all exposed edges, including the back-edges against the wall, butt joints and cut-outs for sinks and stove-tops need to be sealed with a suitable sealant to protect the BisonBord® core from moisture.

**Free  
edging  
strip  
included**

**Easy to  
clean**
